Product Description

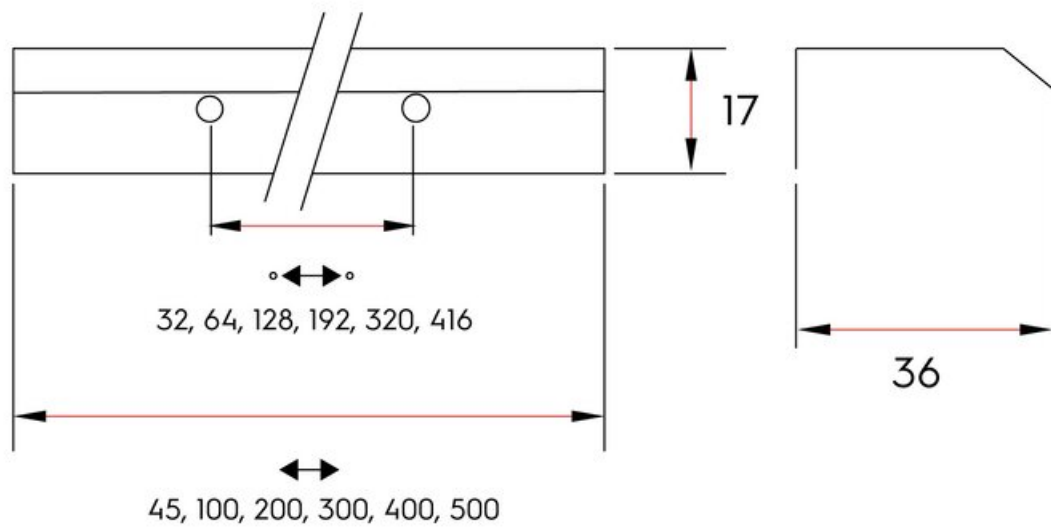

As the years go by, the Curve handle continues to be a success due to its lightness, the fact it is easily installed and its design. It is fitted to the upper part of cupboards and drawers and it takes up such a small space that it functions perfectly in any type of kitchen. Its curved profile of 1mm covers most of the width of the upper part of the furniture, looking as if it discretely pops out of the furniture itself. The stainless steel finish – the king of the range – is available in six overall lengths of 45, 100, 200, 300, 400 and 500mm. A great variety that allows for the creation of different combinations in all types of surroundings.
