Product Description

Wood is currently gaining much ground in the world of handles. The warmth and natural look that it gives to different interiors are factors which have a great influence on the design of furniture accessories this season. The Ara W handle is one of Vief's products which demonstrates this theory. It's a handle which combines a wooden front face with aluminum supports which are screwed onto the piece of furniture. It's straight, polished shape gives it a minimalist, Scandinavian aesthetic which is perfect for bedroom furniture, dressing rooms, bathrooms and kitchens.

It is available in oak and walnut timber of the highest quality, both simple yet elegant. Its two sizes (160mm and 224mm) work well whether fitted vertically (for cupboards from floor to ceiling) or horizontally. It's ideal for white kitchens with wooden units.

Ara W belongs to the [Wood](#) line. Model [0239](#).
Designed by [2J Design](#).
