Product Description

Smee is a reversible handle that can be installed in two positions (towards the top or bottom) and allows for a variety of ways in which to interpret the design of the furniture. And if that's not all, it works whether fitted either horizontally or vertically. It therefore has four different positions which makes it an ideal accessory for kitchens and bathrooms that need an added touch of personality. It is also perfect for office furniture and for desks. It comes in a bright, chrome finish, brushed nickel and in brushed brass, a finish which is very much in fashion and in which many interior designers have now come to rely on for their designs.
