### Product Description

Hexxa is a handle with an aluminum built-in profile with an innovative design, different to all the models manufactured at Viefe® until now. Its two sides have a small incline which gives it a visual effect that is both modern and elegant. The singular characteristic of this model is that it allows you to play with a combination of sizes, as one of the doors can have a longer handle than the other so as to emphasize its fashionable features. It is a handle that can adapt to any size of door measurement that you wish, it is fitted without any complication and means the door can be opened and closed in a really comfortable way. It is available in matt white, matt black, metallic grey and metallic brown. It has been created especially to be fitted to kitchen cupboards and drawers.

### Important Information

Hexxa Complete Sets include both the pre-cut and finished Profile, and the A and B (Left and Right) End Cover Caps. Also sold individually, please see Hexxa OEM Production Pack for details.
