M-Series Dismountable Push-in Fastener

The M-Series dismountable fitting system offers a secure and concealed method for fastening wood claddings, covers, and panels.

Application Type	Push-in Fastener
Colour	Black
Material	Polycarbonate

Product Description

The M-Series dismountable fitting system offers a secure and concealed method for fastening wood claddings, covers, and panels.

Product Advantages

- Tool-free dismountable fastener, employ a push-to-connect or slide-on movement, eliminating the need for specialized tools during final installation or maintenance.
- Secure fastening, providing a strong and reliable hold.
- Designed for easy removal, convenient access to the area behind panels for maintenance, repairs, or modifications.
- Designed to follow the System32 standard, with a backset at 37mm, can be quickly and efficiently assembled due to their standardized measurements.
