| Thread Type | Lo-Root |
| Type | Installation |

Product Description

These are wood screws with:

- Round Washer Head : rounded top with built-in washer for larger bearing surface.
- Original Robertson® square drive
- Lo-Root® Thread
- Aster® Thread Feature

Lo-Root® Threading provides a single lead deep thread with a wide spacing for superior holding in softwoods and particle boards.

Aster® Thread Feature is now standard on all Lo-Root® screws with a serrated tooth thread design, providing quicker starting, reduced splitting and less drive torque.

It is recommend to use only Original Robertson® bits together with Robertson® screws for a true "Cling Fit" that provides maximum recess penetration, holding power and driving performance.

Product Advantages

- Original Robertson® Fastening System
- With true "Cling Fit" in maximum recess
- Aster® serrated teeth on all Lo-Root Deep Threads provide greatest holding strength in soft woods and particle boards
- Sharp thread angles and points offer excellent penetration and engagement

Important Information

-
All Screws under 1" are fully threaded. Screws over 1" are 2/3 threaded to help prevent "jacking" when two materials are fastened together.

To purchase quantities that are less than a full case, please refer to the [Jar version](#) of this product.
