

Salice Air Template for Cabinet

Part Number: STZTMPLTCAB

Salice Air Template for Cabinet Side Drilling

These professional jigs are for use with a hand-held plunge router

<div>
</div>

Product Description

Salice Air hinges are an innovative new hinge for contemporary cabinetry and case goods. Their extremely slim profile is compact yet highly functional. They are fitted to the top and bottom panel of the cabinet providing for truly concealed hinge experience. With a need for only 2 hinges on even tall, heavy or thick doors, you can simplify your designs.

Imagine how these hinges would look mounted on a large and heavy pantry doors where normal hinges may interfere with your internal pantry drawers. Another ideal scenario involves pairing them with Salice's aluminum framed glass panel doors. These truly concealed hidden hinges would make a big difference as there would be nothing visible at all inside the cabinet when the door is closed.

Product Advantages

- Quick and easy drilling for Salice Air hinges
- Easy to adjust for different materials and thicknesses
- Video Guide and Written Manual included
- Professional Grade

Technical Documents

- D** = side overlay
- D1** = top overlay
- K1** = drilling distance for the door
- K2** = drilling distance for the top & bottom panel
- Y** = min distance

SALICE AIR TEMPLATE KIT

There are two separate templates available for the machining of the AIR hinge; one is used for machining both the top and bottom of the door while the other is used for machining the top and bottom cabinet panels.

The top box shown below, with the part # **TZTMPLTCAB**, contains the template used for machining the cabinet parts (top & bottom panels). "**CAB**" refers to **CABINET**. The bottom box, with the part # **TZTMPLTDR**, contains the template used for machining the cabinet door (top & bottom). "**DR**" refers to **DOOR**.

BE AWARE: All machining specifications must be pre-determined and verified prior to template setup. Be sure to calculate the cutting distances for both the doors and cabinets to be certain not to exceed the minimums and maximums for either part.

Now that you know that there are two template kits, let's take a closer look to see what is included inside the **DOOR** template box.

- You should have:
- (4) "U" shaped aluminum channels, 2 long & 2 short.
 - (2) Large black templates (1R & 1L).
 - (1) Pack of bushing guide inserts
 - (1) Hardware package
 - (1) Whiteside Tool pack
