Float 4 Way Corner C Matte Black

Part Number: 086-Z3ZXE-MB

Four way corner connector for creating stacked corners. Screws included.

Finish	Matte Black
Mounting Side	C

Product Description

FLOAT corner connectors allow you to build and configure this shelving system into anything you can imagine. Use the FLOAT Mounting Template to ensure that screw holes are drilled correctly into your FLOAT bar profiles. Once cut and drilled, you just screw together to create your shelf.

Important Information

4-Way Corners Connectors are described as Side-C and Side-D. Use one of each opposite side at the end of each straight bar between two corner joints. When ordering, divide your total count of 4-way corner joints in half to get your C and D order quantity. See technical specifications for assembly examples as you are planning your project.

Product Application

Shelf Dimensions

Wood Shelf:

- Length minus 42mm
- Depth minus 42mm

Glass Shelf:

- Length minus 42mm
- Depth minus 45mm

Technical Specifications

Eureka FLOAT Corner Connectors

Item Description	Part#
3 Way Corner A Side, Matte Black	086-Z1ZXE-MB
