

Molded Plastic Case for Cabinet Hardware Jig

Part Number: TP-CASECHJ

Rigid plastic case with stainless steel clasps and handle will hold True Position's Basic or Premium Cabinet Hardware Jigs - TP-1934 or TP-1935.

Product Description

Fits hardware jig models TP-1934 & TP-1935. Case molded with a free placement design, which allows jig to be returned to case after use without removing attachments or having them in an exact location. Some attachments and accessories that do not need to be adjusted "snap" into their slots for a snug fit. Rigid plastic case with stainless steel clasps and handle for easy transport. Durable design protects hardware jigs and includes extra compartments for drill bits, stop collars and miscellaneous accessories.

Originally the installation jig was sold without a hard plastic case, so if that's the case for you, why not pick one up today and protect your tool investment!

- Outer dimensions 17" x 12" x 3"
- Inner dimensions 16" x 9-3/4" x 2"

Product Advantages

- This case is specifically for past customers who received the jig in a cardboard case
- Rigid plastic case fits and protects genuine True Position Tools cabinet hardware jig models TP-1934 & TP-1935
- Compartments for hardware jig, line boring extensions, extended ruler attachment, drill bits, Allen wrenches, and more
