## Product Description

This puck light has 24 LEDs that give off bright warm and long-lasting light while only using a small amount of energy. Suitable for installation in kitchen cabinets, showcases or exhibits, and in office furniture. The round-design has a removable mounting ring that provides for surface and recessed installation options. Housing made of durable steel with a choice of 4 colour finishes.

## Product Advantages

- Can be surface or recess mounted
- Attractive colour finishes
- Low power usage

## Important Information

How to Order:

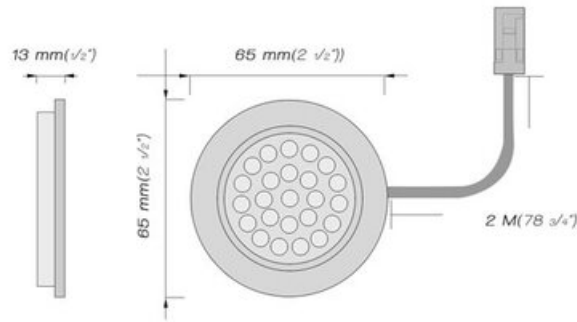

1. Select the colour and decide on the number of LED lights for your application
2. Select the appropriately powered LED Driver for your number of lights. The 12W Driver (03-3165-12) can support 6 lights while the 24W Driver (03-3165-24) can support 10 lights. These lights are not compatible with any other drivers.

3. Order one or two 6-Way Connectors with Switch (03-3163) for your design.
